VACCINATION DEVICES

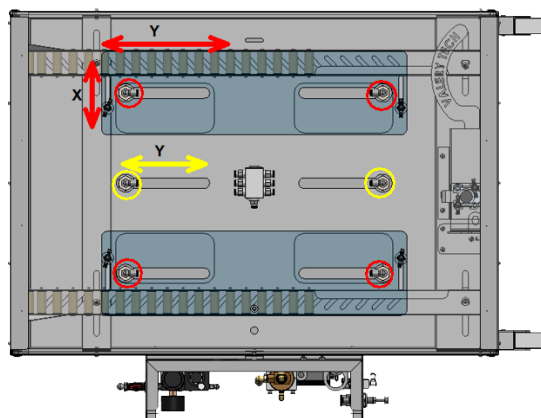

ELITE CAB-MONO
Ref TB.3.00 of 28/08/2024

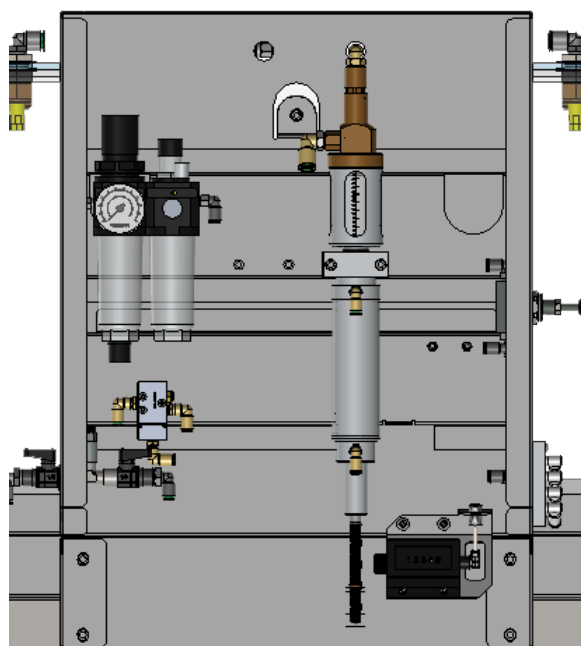

TECHNICAL BROCHURE

DESCRIPTION

Spray Cab - Mono is the one of simplest manual cabinet of the Valery offer, it's though to administrate 1 spray vaccine. The device is the perfect choose for small and medium hatcheries that needs a machine easy to use, cheap and with an high quality of distribution.

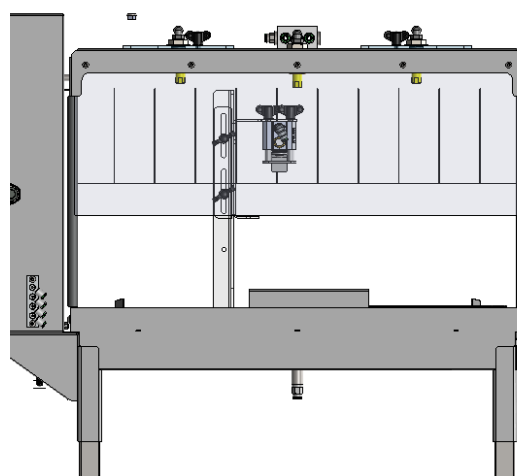

All the parameter are adjustable using the command box on the front of the machine. On the front of the command box there is a mechanical counter that count the box vaccinated.

The device is equipped with 4 nozzles adjustable in x-y direction and 2 nozzles adjustable in y direction to fit with every box dimension.

The machine is also equipped with an adjustable piston to block the box until the end of dispensing

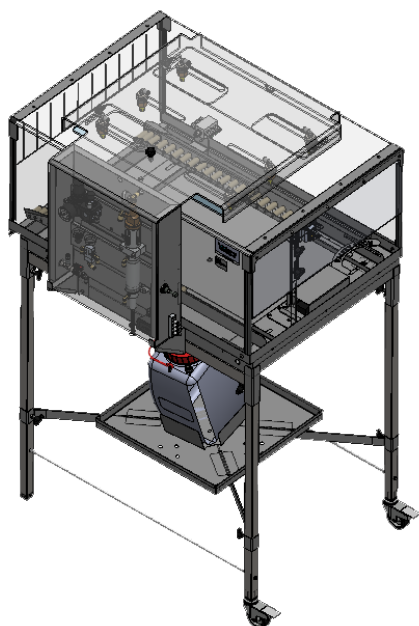

After few test on the machine, simulating a 'standard' condition, (18ml spray; 100chicks) the machine complete a full cycle of administration in about 5-7 seconds (including the operation of insert and take out the box).

The machine comes with 4 different type of nozzle able to offer a droplet range from 120 to 200 microns

The machine like every other cabinet work at least at 5 bar of pressure.

1 tanks of 10 liters will supplied with the machine
