IN-LINE CAB GEL

Easy-to-install automatic and pneumatic device designed for the application of live vaccines, offering high flexibility and reliability:

- **Adjustable and lockable delivery volume from 5 to 30 ml;**
- **Various trunk needle types** available on request;
- **Wide movement range for the needle manifold** to ensure complete and uniform crate coverage;
- **Two separate plastic tanks** (double version includes two tanks; single version includes one);
- **Capable of applying two different vaccines in one complete cycle** (two application moments during a single crate transit — double version);
- **Compatible with automated hatcheries equipped with conveyor lines;**
- **Manual internal-cleaning feature** for easy maintenance;
- **Optional vaccine-mixing feature** available (magnetic stirrer);
- **Dual pumping system** (single pump on the single-tank model) to support high-speed production;
- **Dual version can also operate across two production lines simultaneously;**
- **Built-in mechanical counter.**

Medium / Big hatcheries

Operating pressure: 5 bar

In-line gel system

Up to 36000 birds / h

Spare parts available

Single gel version

Double gel version

SPECIFICATIONS

ARTICLE CODES	0900065 (Single gel version) 0900035 (Double gel version)
SPEED	Up to 36000 chicks per hour
WEIGHT	39 kg (cod. 0900065) 60 kg (cod. 0900035)
DIMENSIONS (H x D x L)	160 x 120 x 80 cm
MATERIALS	Stainless steel Rubber Polycarbonate
INCLUDED WITH	Extra nozzles Pneumatic oil 1 complete piston
