

EGG HANDLING

HCS Prolife®

HCS ProLife® crates are advanced **chick transport containers** specifically engineered to optimise the storage and transportation of day-old chicks while maintaining optimal physiological conditions throughout the process.

By integrating the **Early Feeding** concept, chicks have continuous access to both feed and water during the entire storage and transport phase.

This approach reduces dehydration and body weight loss while supporting early gut development, nutrient absorption and overall chick vitality. Continuous access to nutrients and hydration contributes to improved chick uniformity and provides a stronger start during the critical first days of life.

The images are for illustrative purposes only.

Whether used to manage extended holding periods, longer transport distances or to ensure continuity of the hatchery early feeding programme through to farm placement, **HCS ProLife®** helps maintain chick quality and welfare standards throughout the supply chain.

The crates are designed according to the industry-standard chick crate dimensions of 600 x 400 mm, allowing seamless integration into existing hatchery handling equipment, **transport systems** and farm operations with adjustments that are already available in the market.

Combining **animal welfare**, performance and operational compatibility, **HCS ProLife®** represents an efficient and reliable solution for modern hatchery and poultry production systems.

HCS Crate

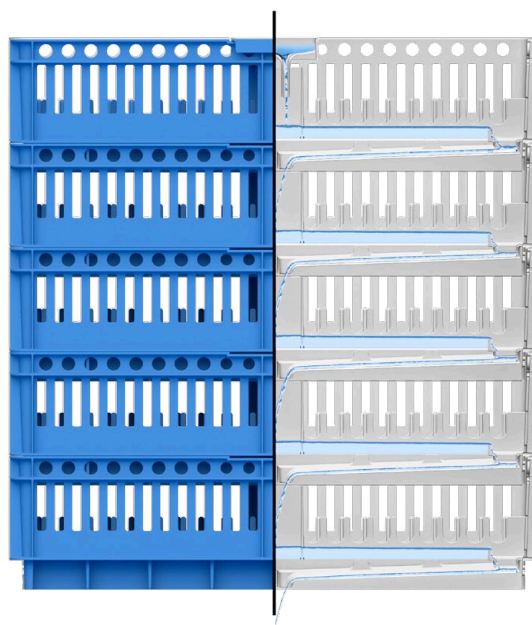

Code	0402006.50
Dimensions	Outside 600x400x151,5 mm Inside 574x374x138,5 mm Water gutter 20x281x16 mm Water 42 cm ³ x 2 Tot = 84 cm ³ of water per crate Feed gutter 20x281x16 mm Feed 64 cm ³ x 2 Tot = 128 cm ³ of feed per crate
Net weight	1.65 kg
Material	High-quality virgin UV-stabilised HDPE material
Standard colour	Transparent white
Capacity	60 chicks
Standard packing	85 boxes per pallet 1200x1000x2200 mm 100 boxes per pallet 1200x1000xh2550 mm
Shipping capacity	889 pcs = 20'cnt 1870 pcs = 40'cnt 2200 pcs = 40'HC

Water dispenser

Code	0402101.50
Dimensions	408x100x69 mm
Net weight	106 g
Material	HDPE
Standard colour	Transparent white
